

XP-160 Driver

160 digital channels Drive or Monitor
Option module with 16 analog channels
10 independent VDR groups + Expanded range
RZ format on all channels & multi-point time sets
4 slot bipolar PS voltages and current monitoring
Built on 18+ years of system and driver expertise

FEATURES:

- ✓ Fully Compatible with the existing i160 BIB's
- ✓ 160 Channels Drive or Monitor
- ✓ Voltage, Frequency, Vector Compare, Sign of Life , Current
- ✓ 16 Meg Pattern Depth per channel standard
- ✓ Compatible with Infinity160 Driver features

++ PLUS ++

- up to 3x faster download times
- Speed up to 25 MHz at 16Meg Depth
- 4 point clock shape definition (Normal , RZ , NRZ)
- Any channel can be assigned to clock format
- Expanded range VDR (VIH) Voltage drive (0.5V to 5.5V)
- 10 independent VDR (VIH) groups
- Bi-polar Power Supply Voltage measurements
- Improved Mechanical design
- (Optional Module) 16 independent sine wave
- Runs with "INSPIRE" software

(Future Capabilities)

- 32, 64, or 128 Meg Depth per channel
- Support integrated thermal socket solutions
- APG Memory Testing
